
[On-line Punching Plastic Thermoforming Machine](#)

On-line Punching Plastic Thermoforming Machine

A plastic thermoforming machine is applicable for forming PP, HIPS, PS, PVC, PET and PE plastic sheets which are mainly used for making plastic cups, bowls, covers, boxes, and trays, including milk cup, jelly cup, ice cream cup, chocolate boxes, fast noodle bowl, fruit container, and cake trays.

Hengfeng HF-760×540A on-line punching plastic thermoforming machine is a new machine that is specially designed for the production of high quality and complicated structured plastic containers. It has the following characteristics.

Firstly, it is PLC controlled and comes with a human machine interface, which makes the machine operation simple and easy.

Secondly, this plastic thermoforming machine adopts Japan YASKAWA servo motor for material feeding and drawing. In addition, its puncher has functions like cup-stacking and counting, which can reduce pollution.

Main technical parameter

Max. Forming Area	760×540mm
Max. Forming Depth	Up 150mm Down 100mm
Sheet Thickness Range	0.2-1.5mm
Max. Forming Speed	10-30cycles/min
Max. Punching Speed	20-75cycles/min
Max. Cutting Area	800×250mm

In order to offer our plastic thermoforming machine at competitive prices, we make substantial efforts to reduce our production cost. We have our own workshops and land, and we also establish long term relationship with logistics companies and shipping companies, so as to save on the transportation cost of our and our clients. Our convenient transportation also enables us to deliver our goods timely, thus enabling customers to use our products as soon as possible.

In addition to plastic thermoforming machines, we also provide other products, like plastic extrusion machinery, plastic cup clip curling machine, etc. to satisfy customers' different demands. If you are interested in our products, please turn to the relevant pages to have more detailed information. We will provide you with the best service.
